

Electric bolt lock with mechanical keys user manual

Product feature

- * Power-on unlocking type.
- * Door magnetic feedback signal NO/COM.
- * Unlocking with mechanical keys in design.
- * Lock core have pick-proof function in design.
- * Ultra-low power design, and holding current less than 0.2A.
- * Have LED display when open/close the door ,red for open the door and green for close the door.
- * Super long working life, pass 200 thousand life test.

Product parameter

- * Lock size: L215*W30*H37mm
- * Lock tongue size: protrude length 14mm, dia.12.5mm
- * Working current: start 1.2A holding 0.2A
- * inbuilt size: L170*W25*H34mm
- * Working Voltage: DC12V/24V
- * Delay function: 0/3/6/9 delay can be selected

Diagram of wiring

Five wire electric bolt lock Power-on unlocking	<ul style="list-style-type: none"> Black(Negative, GND) Red(Positive, DC12V/24V) Purple(Unlocking signal) Gray (COM) Green(NO)
	<p>R: The lock will unlocking when purple wire contact with red wire after plug in power supply.</p> <p>R: Green wire and gray wire in a closed state when when the door magnetic induction, and in a off state when magnetic move away.</p>
